

Chest x-ray

Take off your overcoat and leave it in the waiting room.

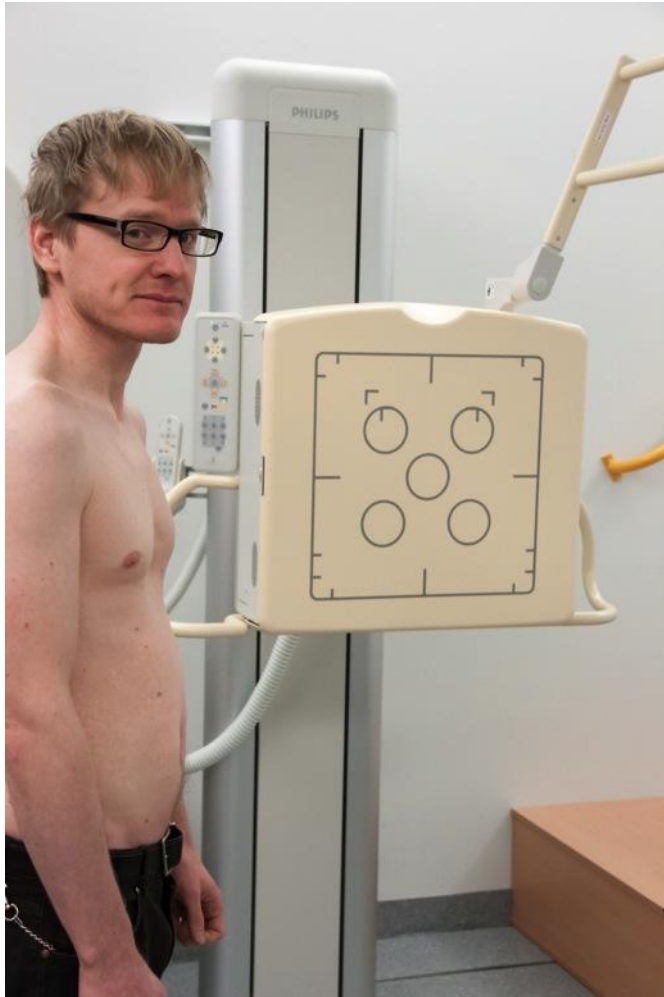

Take off all the clothes from the upper body.

Leave the clothes in the waiting room.

Go to the x-ray room. Follow the instructions given by the nurse.

The first x-ray is taken from front to back. The nurse helps you to stand in a right position.

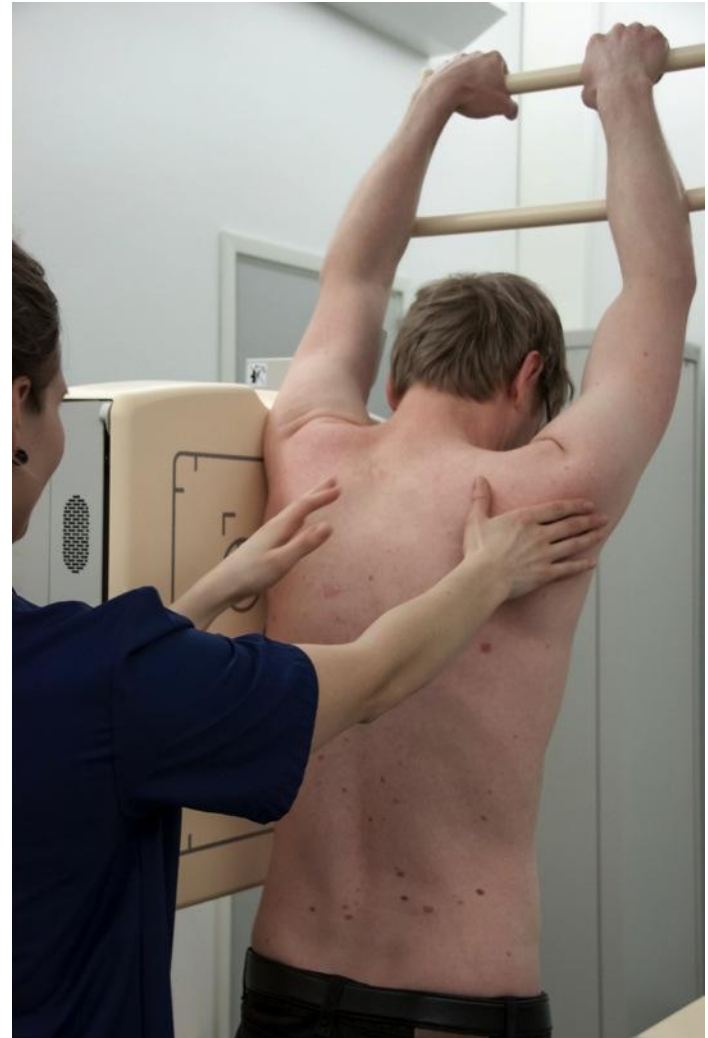

The nurse adjusts the x-ray machine.

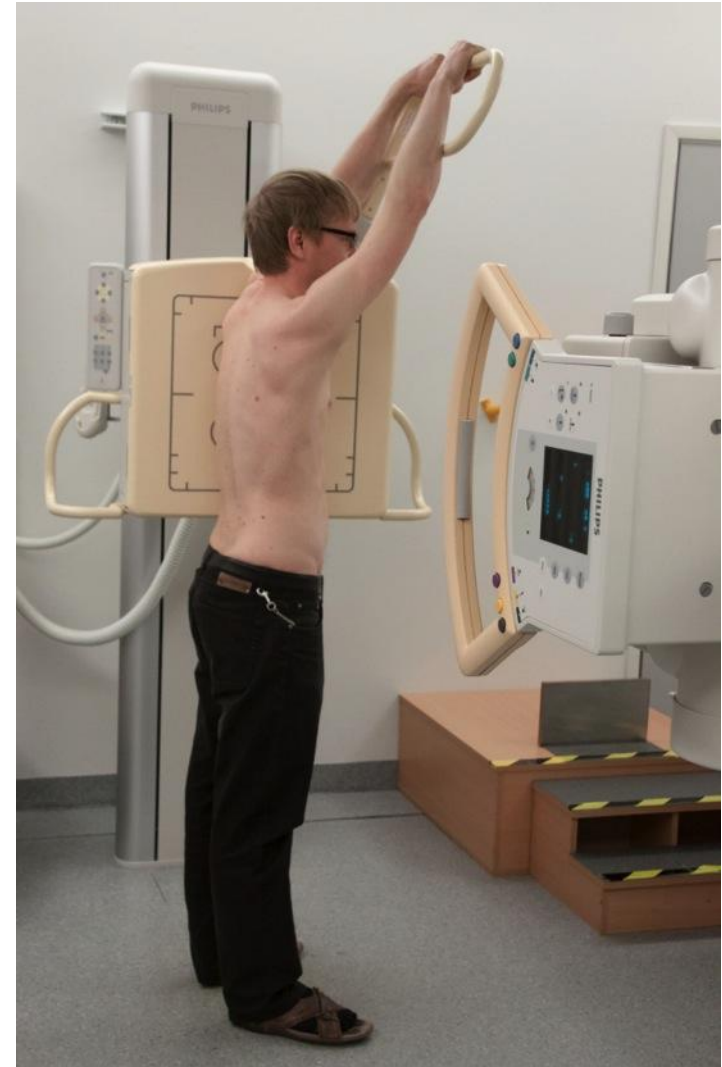

Inhale so that your lungs are full of air. Hold your breath during the imaging.

The second x-ray is taken sideways.

Inhale so that your lungs are full of air. Hold your breath during the imaging.

The nurse will let you know when
you can leave.

Thank you for cooperation

- Infectious disease specialist of Tampere University Hospital
- Nurse from the imaging unit of Tampere University Hospital
